CAREER OBJECTIVE

Creative and enthusiastic recent graduate in software engineering. Seeking entry level graduate position in application design and development. Offering strong programming knowledge and experience in software application design and development.

SKILLS

TECHNICAL SKILLS

Languages: Java, C#, C/C++, HTML, CSS, JavaScript, XML, Haskell, Prolog, PHP, MySQL

Tools: Android Studio, Microsoft Visual Studios, Adobe Dreamweaver, Adobe Photoshop, GitHub,

Platforms: MacOS, Windows, Android,

OTHER SKILLS

- Conflict resolution - Working in teams I have gained valuable skills in resolving conflict, taking initiative, and communicating with other members of the team
- Communication - Communicating with clients, other team members

EDUCATION

MASSEY UNIVERSITY
Auckland, new zealand.
Bachelor of Information Sciences (BInfSc), Software Engineering

JANUARY 2013 - DECEMBER 2016

NORTHCOTE COLLEGE
Auckland, new zealand.
National Certificate of Education (NCEA), Level 3

JANUARY 2008 - DECEMBER 2012

EXPERIENCES

SOFTWARE DEVELOPER

Electrix Ltd.

MARCH 2016 - MARCH 2017

Worked with a team on a software project called LoneSafe for Electrix Ltd. LoneSafe is a platform on the cloud that tracks lone workers through their android smart phone. LoneSafe allows Electrix to remotely monitor their workers, ensuring their safety. This project was initially supervised by Massey University as part of the final year software engineering project, after which I was employed as a part-time developer to continue work on the platform.

My role in this project consisted of:

- Android application development
- Database design and development using MySQL, PHP, and PHPMyAdmin

SOFTWARE DEVELOPER

Massey University,

AUGUST 2016 - MARCH 2017

Software developer working with a team of other developers and Massey University researchers to design, develop and document a web-based virtual research environment for the Massey Geoinformatics Collaboratory.
